Technical Product Manager

Description

We are looking for an experienced Technical Product Manager who is passionate about building products that customer love. You will be joining a fast-paced and dynamic team and working with a cross-functional team to design, build and roll out products that deliver the company's vision and strategy.

Responsibilities

- Gain a deep understanding of customer experience, identify and fill product gaps and generate new ideas that grow market share, improve customer experience and drive growth.
- Translate product strategy into detailed requirements and prototypes.
- Scope and prioritise activities based on business and customer impact.
- Work closely with engineering teams to deliver quick time-to-market and optimal resources.
- Drive product launches including working with executives, and other product management team members.
- Scope and manage the product roadmap that clearly describes future updates and their expected launch schedule.
- Work with the customer support team to identify the customer issues, and categorise and channel them towards the engineering team for optimal and timely resolutions.
- Evaluate promotional plans to ensure that they are consistent with product line strategy and that the message is effectively conveyed.
- Act as a product evangelist to build awareness and understanding.
- Prepare and manage customer feedback channels.
- Prepare and manage KPIs for product growth and improvements.
- Conduct meetings with cross-functional teams for planning, review and innovation.

Qualifications

- Proven work experience of at least 2-3 years in product management.
- Proven track record of managing all aspects of a successful product throughout its lifecycle.
- Proven ability to develop product and marketing strategies and effectively communicate recommendations to executive management.
- Solid technical background with understanding and/or hands-on experience in application development and web technologies (PHP, NodeJS, ReactJS, HTML & CSS, WordPress).
- Experience/or understanding of server deployments and configurations. (Linux, Kubernetes)
- Strong problem-solving skills and willingness to roll up one's sleeves to get the job.
- Skilled in measuring progress using tools and technologies.
- Strong documentation skills. Needs to be very skilled in organising documentation pertaining to the product.
- Excellent written and verbal communication skills in English.
